Zed + IntelliJ IDEA Cheatsheet

Vim mode | leader = Space | normal mode
from merkio/ide_vim_configs (keymap.json, .ideavimrc)

FILES & SEARCH	ZED	IDEA
`Space f`	File finder	Go to File
`Space p *`	Command palette	Search Everywhere
`Space o`	Tab switcher	Recent Files
`Space b *`	Symbol outline	Switcher (tabs)
`Space e`	Project panel	Project window
`Space t`	Terminal panel	Terminal window
`Space /`	Project search	Find in Path
`Space s`	Save	Save All

CODE NAV	ZED	IDEA
`g d`	Definition	Declaration
`Space g d`	Definition	Declaration
`Space g i`	Implementation	Implementation
`Space g t`	Type definition	Type declaration
`Space g r`	Find references	Find usages
`Space g u`	-	Show usages
`g r *`	Find references	-
`g i *`	Implementation	-
`K`	-	Quick JavaDoc
`] d / [ d`	Next / prev diag.	Next / prev error
`Space h / l *`	Pane left / right	Back / Forward

EDIT	ZED	IDEA
`Space r`	Rename	Rename
`Space c a`	Code actions	Intention actions
`Space c f`	Format	Reformat code
`Space Space`	Clear search hl	Clear search hl
`Y`	-	Yank to EOL (y$)

RUN & DEBUG	ZED	IDEA
`Space d b`	Toggle breakpoint	Toggle breakpoint
`Space d c *`	Focus debug panel	Choose debug cfg
`Space r c`	-	Choose run cfg

SPLITS & PANES	ZED	IDEA
`Space h/j/k/l *`	Pane L / D / U / R	-
`Ctrl h/j/k/l *`	-	Split L / D / U / R

In IDEA, Space h / Space l are Back / Forward, not pane moves.

IDEAVIM PLUGINS (enabled)	
`surround`	ys{motion}{c}, cs{old}{new}, ds{c}
`commentary`	gcc line, gc{motion}, gc in visual
`multiple-cursors`	Alt+n next, Alt+x skip, Alt+p undo
	g Alt+n select all matches
`matchit`	% jumps between pairs / tags
`highlightedyank`	Flash on yank
`NERDTree`	Tree keys in project window
`ideamarks`	Vim marks as IDE bookmarks

DIFFERENCES TO WATCH

Space h / l: panes in Zed, Back / Forward in IDEA.

Space p: command palette in Zed, Search Everywhere in IDEA (use Cmd/Ctrl+Shift+A for actions).

Space b: outline in Zed, open-tab Switcher in IDEA.

Space d c: opens the debug panel in Zed, picks a debug config in IDEA.

Space r vs Space r c (IDEA): Rename waits for the timeout in case you type c.

g r / g i exist only in Zed; **K**, **Y**, **Space g u** only in IDEA.

IDEAVIM OPTIONS	
`number`	Absolute + relative line numbers
`scrolloff=5`	Keep 5 lines around cursor
`ignorecase`	Smart-case search (smartcase)
`hlsearch`	Highlight + incremental search
`clipboard`	unnamedplus: yank uses system clipboard
`ideajoin`	J joins lines IDE-style
`refactormode`	idearefactormode=keep

WHERE THINGS LIVE	
`Zed`	~/.config/zed/keymap.json
	Palette: zed: open keymap
`IDEA`	~/.ideavimrc
	:source ~/.ideavimrc to reload

Zed bindings apply in: Editor && mode == full && VimControl && !menu. The repo's settings.json is for another tool (pi), not Zed.

Highlighted rows (*) behave differently in Zed and IDEA. A dash means the key is not mapped in that editor's config.

Zed Workflow Keybindings

Cmd = macOS | Ctrl = Linux / Windows
Zed default keymaps (default-macos, default-linux, vim)

NAVIGATE THE WORKSPACE

Cmd/Ctrl+P	Open file by name
Cmd/Ctrl+Shift+P	Command palette
Cmd/Ctrl+Shift+O	Symbols in this file
Cmd/Ctrl+T	Symbols in project
Ctrl+G	Go to line
Ctrl+Tab	Tab switcher
Cmd/Ctrl+W	Close tab
Cmd/Ctrl+Shift+T	Reopen closed tab
Cmd/Ctrl+\	Split pane right
Cmd/Ctrl+K, Down	Split pane down
Cmd/Ctrl+B	Toggle left dock
Cmd/Ctrl+Shift+E	Focus project panel
Cmd/Ctrl+J	Toggle bottom dock
Ctrl+`	Toggle terminal
Shift+Esc	Zoom focused panel
Cmd/Ctrl+,	Open settings

SEARCH

Cmd/Ctrl+F	Find in current file
Cmd/Ctrl+Shift+F	Search across project
* / #	Vim: word under cursor, next / prev
Ctrl+o / Ctrl+i	Vim: jump back / forward

CODE INTELLIGENCE

F12	Go to definition
Alt+F12	Definition in split
Alt+Shift+F12	Find all references
F2	Rename symbol
Cmd/Ctrl+.	Code actions / quick fix
F8	Next diagnostic
Cmd/Ctrl+Shift+M	Project diagnostics
Cmd/Ctrl+Shift+I	Format document
Alt+Shift+O	Organize imports
Ctrl+Space	Trigger completions
Cmd/Ctrl+I	Signature help

EDITING

Cmd/Ctrl+D	Select next occurrence
Cmd/Ctrl+Shift+L	Select all occurrences
Cmd+Alt+Up/Down	Add cursor above / below
	Linux: Shift+Alt+Up/Down
Alt+Up / Alt+Down	Move line up / down
Cmd/Ctrl+Shift+K	Delete line
Cmd/Ctrl+L	Select line
Cmd/Ctrl+/	Toggle comment
Alt+Shift+Right/Left	Expand / shrink selection
	Mac: Ctrl+Shift+Right/Left
Cmd/Ctrl+K, Cmd/Ctrl+L	Toggle fold

DEBUG

F9	Toggle breakpoint
F4	Start debugging
F5	Continue / rerun
F10	Step over
F11	Step into
Shift+F11	Step out
Shift+F5	Stop session

GIT & AI

Ctrl+Shift+G	Open git panel
Cmd+Alt+G B	Git blame (Linux: Alt+G B)
Cmd/Ctrl+?	Toggle agent panel
Ctrl+Enter	Inline assist in editor

VIM-MODE DEFAULTS (built in)

K or g h	Hover docs
g D	Go to declaration
g y	Go to type definition
g I	Go to implementation
g A	Find all references
g s / g S	Symbols: file / project
g .	Code actions
g a	Select all matches of word
g c c	Comment line (gc + motion)
] c / [c	Next / prev git hunk
] b / [b	Next / prev tab
] e / [e	Move line down / up
Ctrl+w h/j/k/l	Move between panes
Ctrl+w v / s	Split vertical / horizontal
Ctrl+w c	Close pane item
z a / z c / z o	Fold toggle / close / open
g x / g f	Open URL / file under cursor

Your keymap already rebinds g d, g r, g i and the Space shortcuts (page 1). g r and g i are yours, since Zed's own keys for those are g A and g I.
